

Multi-Newspaper Distributor Software

SYSTEM OVERVIEW (FINAL ARCHITECTURE)

ROLE SYSTEM

Super Admin (Platform Owner / Developer)

Scope: Entire system (all agencies)

- 1 Manage all agencies
- 2 View agency analytics and server performance
- 3 Control server, database, and global settings
- 4 Enable/disable agencies
- 5 Monitor usage
- 6 Cannot interfere with daily agency operations (best practice)

Admin (Agency Owner)

Scope: Full control within their agency

- 1 Add and manage stock
- 2 Add/remove workers
- 3 Manage customers
- 4 Set pricing
- 5 Billing and payments
- 6 View reports
- 7 Manage salaries
- 8 Can do anything inside their agency

Worker (Distributor)

Scope: Limited to own data

- 1 View assigned newspapers and today's stock
- 2 Enter taken and returned quantities
- 3 View own sales and salary
- 4 Cannot see pricing or other workers or admin data

SYSTEM FLOW

Step 1: Super Admin

- 1 Creates agency
- 2 Creates admin account

Step 2: Admin Setup

- 1 Adds newspapers, prices, workers, and customers

Step 3: Daily Operation

- 1 Morning: Add stock
- 2 Distribution: Workers take newspapers
- 3 Evening: Workers enter returns

System automatically calculates: $\text{Sold} = \text{Taken} - \text{Returned}$, daily income, remaining stock

Step 4: Monthly Process

- 1 Generate customer bills
- 2 Calculate worker salary
- 3 Show profit/loss

CORE MODULES

Newspaper Management

- 1 List newspapers
- 2 Multi-language support
- 3 Admin-controlled pricing

Stock Management

- 1 Daily stock entry
- 2 Track remaining stock
- 3 Prevent over-distribution

Worker Management

- 1 Add/remove workers
- 2 Assign newspapers
- 3 Track taken, returned, sold

Customer Management

- 1 Daily, weekly, monthly, yearly customers
- 2 Subscription tracking

Pricing System

- 1 Set by admin
- 2 Varies per agency
- 3 Used in sales and billing

Billing System

- 1 Monthly bill generation
- 2 Track paid/unpaid
- 3 Optional delivery charges

Salary System

- 1 Based on delivery count and commission

Analytics & Reports

- 1 Daily, weekly, monthly reports
- 2 Worker performance
- 3 Profit and stock reports

DATA CONTROL RULES

- 1 Each agency sees only its own data
- 2 Workers see only their own records
- 3 Super admin sees everything

PAGE FLOW

- 1 Login
- 2 Terms and conditions
- 3 Welcome page
- 4 Dashboard
- 5 Admin pages (newspapers, stock, workers, customers, billing, reports)
- 6 Worker pages (assignment, entry, sales)
- 7 Super admin pages (agency management, analytics, server monitoring)

KEY BUSINESS LOGIC

- 1 $\text{Sold} = \text{Taken} - \text{Returned}$
- 2 $\text{Income} = \text{Sold} \times \text{Price}$
- 3 $\text{Monthly billing} = \text{Subscription} \times \text{Days}$
- 4 $\text{Salary} = \text{Work done} \times \text{Rate}$

FINAL SYSTEM LEVEL

- 1 Multi-agency system
- 2 Role-based control
- 3 Real business workflow
- 4 Scalable SaaS model
